

### 組合斜坡 ~ 插槽接合法 (專利發明)

#### Slot Assembling Ramp (patented invention)

《活動斜坡》由兩組伸縮路軌和下支架組成。當中用『插槽接合法』連接各組件，無須工具，方便、易裝、穩固、準確、可組合，是突破支架裝嵌的新技術。在相連的金屬板長方槽上用合適的有槽連接扣套入，連接扣套入後露出的槽剛好配合固定扣，固定扣的特定位置剛好套入連接扣的槽內。因為連接扣填補了槽坑的空間，加上固定扣的迫緊，所以可承受很大的重力，情況就如原本的材料一樣可承受相同的重力。《活動斜坡》可用廉價材料做到高價材料的效果。靈活、穩固、成本低、組裝容易。

The "Slot Assembling Ramp" is mainly formed from two sets of telescopic metal tracks that ramp sections can be fastened securely through our patented "slot assembling method" without welding, bolts or screws to be used. This "Slot Assembling Ramp" is lightweight, easy to set up and low in cost.
